Environmental Policy Statement

Company: Cloudgap Ltd

Date: November 2026

1. Introduction and Purpose

Cloudgap Ltd is a specialist cybersecurity and AI governance consultancy. While we operate primarily in the digital domain as a professional services provider, we recognise that our operations—including IT infrastructure, business travel, and electronic hardware—have an impact on the environment.

We are committed to understanding, managing, and minimising our environmental footprint. This policy outlines our commitment to sustainable business practices and serves as the foundation for our environmental management approach.

2. Core Commitments

To align with our sustainability goals and public sector procurement standards, Cloudgap Ltd formally commits to:

- **Protecting the Environment:** Taking actionable steps to prevent pollution and minimise our carbon footprint across all operations.
- **Compliance:** Fully complying with all relevant environmental legislation, regulations, and approved codes of practice (such as WEEE regulations for electronic waste).
- **Continuous Improvement:** Continually monitoring, reviewing, and improving our environmental performance and operating practices.

3. Operational Measures

As a digital-first consultancy, we focus our environmental efforts where we have the greatest material impact:

- **Green Computing & Cloud Infrastructure:** We operate a cloud-first infrastructure. We actively partner with major cloud service providers and data centres that are committed to energy efficiency and 100% renewable energy procurement.
- **E-Waste & IT Hardware:** We ensure the responsible lifecycle management of all company hardware. All retired laptops, servers, and IT assets undergo secure data destruction and are processed via certified recycling partners to ensure zero electronic waste is sent to landfill.
- **Sustainable Travel:** We operate a remote-first delivery model, executing client engagements virtually wherever feasible to eliminate unnecessary commuting emissions. When on-site visits are required, staff are directed to prioritise public transportation and rail travel over private vehicles or domestic flights.

- **Paperless Operations:** We maintain a strictly digital-first office environment, utilising electronic signatures, digital compliance platforms (such as GRC 360 Assure), and paperless invoicing to eliminate physical resource waste.

4. Communication and Governance

This policy is communicated to all employees, associate contractors, and partners working on behalf of Cloudgap Ltd to ensure they understand and uphold our environmental commitments.

The executive leadership of Cloudgap Ltd takes ultimate responsibility for this policy and will review it annually to ensure it remains relevant, effective, and aligned with our Net Zero 2045 objectives.

Signed on behalf of Cloudgap Ltd:

Pritesh Hathi
